

## Call for Papers Topical Issue of the European Physical Journal D

### ***“Microplasmas: Scientific Challenges and Technological Opportunities”***

**Editors: J. Hopwood, H. Kersten, and J. Lopez**

The EPJ D is soliciting manuscripts to be published in a Topical Issue of the journal devoted to ‘Microplasmas; Scientific Challenges and Technological Opportunities’. We are seeking original research papers of the highest quality. The main emphasis will be on papers that advance our basic scientific understanding of microplasmas. Papers reporting applications of microplasmas are also accepted as long as they also provide some insight into the underlying plasma science. Papers that purely describe applications of microplasmas will not be accepted.

Deadline for submission of manuscripts for this Topical Issue is April 30, 2010 and the tentative publication date will be November 2010. Authors are invited to use preferably the online submission portal of the journal at <https://articlestatus.edpsciences.org/is/epjd/>. If you are a first-time author with EPJ D, you must first register, which can be done directly on the above web site. When submitting your contribution, please select ‘Microplasmas’ under the tab for Special Issues. Contributions can also be sent directly to [epjd@edpsciences.org](mailto:epjd@edpsciences.org). We would further appreciate it, if you could include with your submission the names and contact information of at least 4 qualified individuals who could review your paper. To help you prepare your manuscript the style files for EPJ D can be found at <http://www.epj.org/makro.html>. More general information about EPJD is available on <http://www.epj.org/>.

Please address any questions you may have regarding this Topical Issue to one of the editors Jeffrey Hopwood, Holger Kersten, Jose Lopez or to Kurt H. Becker, Editor-in-Chief of EPJ D at [epjd@edpsciences.org](mailto:epjd@edpsciences.org).
