**Instructions for authors**

**Article categories**

EPJ E publishes **Regular Articles**, which are original research papers that report results in the domain of Soft Matter, Flowing Matter and Living Systems. Besides, there are also **Colloquiums** that describe the development of new areas of research or the impact of new and promising experimental or theoretical methods in the fields that are within the spectrum of topics covered by the journal. While not as extensive and complete as reviews in the usual sense, they are intended to suitably introduce new research directions and techniques in their early stages of development, and to a wider audience. There is no explicit constraint regarding the length of such manuscripts, although 20 printed pages would be the most usual length. **Topical Reviews** provide a comprehensive and extensive summary of recent research results in a field that is within the spectrum of topics covered by EPJ E and are of current interest to a broader audience. A topical review should aim to summarize the pertinent experimental, theoretical, and computational results obtained by the key research groups working in the field in the past 10 years. Historical reviews of an entire sub-field of physics are discouraged. There is no explicit constraint regarding the length of such manuscripts, although 35 printed pages would be the most usual length. All invited/submitted manuscripts will undergo the same refereeing procedure as all other contributions submitted to the journal. For invited colloquium papers, authors will receive a honorarium, and if available, otherwise full journal names are provided. There are 3 main types of footnotes:

1. **Footnotes to text material**, which should be kept to a minimum, and which should be indicated by numerical superscripts: (1), (2), etc. They should be placed at the foot of the relevant page.

2. **Footnotes to tables**, which should be indicated by superscript lower-case letters: a, b, c, etc.

3. **Footnotes to sub-sections** (of the main body of the paper) should be indicated by superscript lower-case letters: (a), (b), etc.

**Acknowledgments and appendices**

The acknowledgments section should follow the main body of the paper and should precede any appendix. Appendices should be labelled A, B, etc. (Appendix A or Appendix A. Complex developments, when there is a title). Equations in the appendices should be numbered consecutively, but separately from those in the main body of the paper (A.1), (A.2), etc. In each appendix equations should be numbered separately (B.1), (B.2), etc.

**Author contribution statement (mandatory)**

Please provide a statement at the end of the paper (after the Acknowledgments) in which the nature of the contribution of each author is made explicit.

**References**

It is important to check the accuracy of bibliographic information in references. This has become more important with the on-line version. Hyperlinks will be programmed to enable readers to jump directly to the material cited. If your reference citations are incorrect or incomplete (e.g., missing author name, or an incorrect volume number or page), the associated hyperlinks may fail, and the usefulness of your paper in the on-line environment may be diminished. References are quoted with arabic numerals in square brackets in order of appearance in the text. Literature citation of periodicals [1-3], books [4], proceedings [5] and preprints [6] should be organized according to the following examples. Note that journal names should be abbreviated according to the list of serial title word abbreviation of the ISDS (International Serial Data System) if available, otherwise full journal names are preferable.

If necessary the DOI (Digital Object Identifier) of the cited literature may be added at the end of the reference.

**IMPORTANT:** To ensure that the CrossRef facility can hyper-link to the articles quoted in the bibliography, the following rules must not be used. I.e., a list of references under the same number is not allowed: each reference has to be singly numbered.

---

**A brief biography** (a maximum of 100 words per author) will be solicited by the journal editors. Authors wishing to submit a colloquium paper will be free of charge. Colloquium papers are generated from papers that report results in the domain of physics and are of current importance. New research directions and techniques in their early stages of development, and to a wider audience. There is no explicit constraint regarding the length of such manuscripts, although 20 printed pages would be the most usual length. **Topical Reviews** provide a comprehensive and extensive summary of recent research results in a field that is within the spectrum of topics covered by EPJ E and are of current interest to a broader audience. A topical review should aim to summarize the pertinent experimental, theoretical, and computational results obtained by the key research groups working in the field in the past 10 years. Historical reviews of an entire sub-field of physics are discouraged. There is no explicit constraint regarding the length of such manuscripts, although 35 printed pages would be the most usual length. All invited/submitted manuscripts will undergo the same refereeing procedure as all other contributions submitted to the journal. For invited colloquium papers, authors will receive a honorarium, and if available, otherwise full journal names are provided. There are 3 main types of footnotes:

1. **Footnotes to text material**, which should be kept to a minimum, and which should be indicated by numerical superscripts: (1), (2), etc. They should be placed at the foot of the relevant page.

2. **Footnotes to tables**, which should be indicated by superscript lower-case letters: a, b, c, etc.

3. **Footnotes to sub-sections** (of the main body of the paper) should be indicated by superscript lower-case letters: (a), (b), etc.

**Author contribution statement (mandatory)**

Please provide a statement at the end of the paper (after the Acknowledgments) in which the nature of the contribution of each author is made explicit.

**References**

It is important to check the accuracy of bibliographic information in references. This has become more important with the on-line version. Hyperlinks will be programmed to enable readers to jump directly to the material cited. If your reference citations are incorrect or incomplete (e.g., missing author name, or an incorrect volume number or page), the associated hyperlinks may fail, and the usefulness of your paper in the on-line environment may be diminished. References are quoted with arabic numerals in square brackets in order of appearance in the text. Literature citation of periodicals [1-3], books [4], proceedings [5] and preprints [6] should be organized according to the following examples. Note that journal names should be abbreviated according to the list of serial title word abbreviation of the ISDS (International Serial Data System) if available, otherwise full journal names are preferable.

If necessary the DOI (Digital Object Identifier) of the cited literature may be added at the end of the reference.

**IMPORTANT:** To ensure that the CrossRef facility can hyper-link to the articles quoted in the bibliography, the following rules must not be used. I.e., a list of references under the same number is not allowed: each reference has to be singly numbered.
Figure and table captions
Each caption should be written as a single brief paragraph without indentation. Figures and tables should be consecutively numbered with Arabic numerals as they are cited in the text.

Figures
Each figure should be cited in the text. The final size of the figures should fit either one-column width or full-page width. All details of the figure should be visible and labelling legible, therefore:
- make sure that the size of the lines is not lower than 0.3 pt,
- use thick continuous or dotted lines or too heavy lettering and thick lines that may result unsightly after reduction (if any).

When supplying your PostScript file please strictly adhere to the standards given in the section Guidelines for submission after acceptance.

Colour figures: By default, figures appear in colour in the electronic version but they are published in black and white in the paper version of the journal. Therefore, reference to colour coding in both captions and main text should be avoided unless absolutely essential for the description of a figure. In cases where authors would like to have their figures in colour in print as well, the journal will charge a flat fee of EUR 600 (+VAT) per article, without any limitation on the number of colour figures in that article.

Graphical abstract
EPJE features a graphical abstract that contains a graphic presentation for each published articles on www.epj.org, in addition to the title and author list. Before acceptance, authors are required to submit a graphic that, in conjunction with the paper title, is meant to convey the essence of the work and capture the reader’s attention. Please note that the graphical abstract is not an abstract and is not to provide specific results. It may be an item already present in the manuscript or a purpose-made graphic. If the paper has no graphic, the authors can create a new one (or use an equation). Of course, the submission of a graphical abstract already used in the graphical abstract or in the contents of another journal publication is not allowed. The use of color is strongly encouraged. It should be of high visual quality in order to reproduce well.

The graphical abstract file should be created at publication size, ideally a graphic file (ONLY .jpg, .png) with a maximum width of 480 pixel.

Cover
Authors of accepted papers are encouraged to submit images for consideration as a cover. Cover images are linked to a specific paper in that issue. Illustrations are selected for their scientific interest and aesthetic appeal. Please send electronic files at the revision stage. Please also include a clear and concise caption explaining the image.

Electronic supplementary material
Electronic multimedia files (animations, movies, audio, etc.) or supplementary information (appendices, (large) tables, images, programmes, etc.) which is either too voluminous for printing or is designed specifically for Web can be published online along with the article.

Authors should submit the material in electronic format together with the article:
- as standard file formats: MPEG-1 (.mpg) for audio, video and animations; PDF for text and presentations,
- supply a concise and descriptive caption for each file,
- make a specific mention of the suplementary material in the text (e.g., as shown in movie 2) and name your files accordingly, e.g., movie2.mp4.
- Electronic supplementary material will be published only if the authors without any conversion, editing, or reformatting.

For more information, please contact the Editorial Office.

Research data policy
EPJE strongly encourages that all datasets on which the conclusions of the paper rely should be available to readers and that the authors should provide a statement of data availability indicating which they describe where the relevant data can be found. Please click here for more details and information on recommended repositories.

The acceptance stage
In the case that the files have not been sent with the revised version, and before sending the official letter of acceptance, the Editorial Office will ask for the final electronic file (EPJX, EPJP: Word) of the paper corresponding exactly to the pdf accepted by the editor.

Authors are informed that any missing element in an accepted article (electronic file of the text or of the figures) will delay the publication date. The Editorial Office will keep the paper on a waiting list until all missing material is received. Without this no modifications can be made either to the text or to the figures. If any, the manuscript will be sent back to the editor and possibly to the referees.

File formats
Text
We would appreciate receiving articles prepared in EPJX or EPJ, in addition to the title and author list, with a maximum of 480 pixel.

We will, however, accept texts written with any common variant of TEX, including EPJX (standard, article class) and EPJP (text and Word files). No customised or personal style sheets should be used.

Also, no particular fonts should be used (authors are reminded that the journal will be printed with Computer Modern (CM) standard fonts). In any case, the A4’s EPS-EPJX package, that defines several environments for creating multi-line display equations, may be used. For both, prepared with Word authors should be aware that only the text will be processed and that mathematical symbols and equations will be re-typed in EPJX by the Production Staff.

Figures
Remember that figures should be in separate files, that an unnecessary text material (captions, figure numbers, author name, frames, etc.) should be included. The preferred macro package for including EPS graphics files is the EPJX “graphics” package.

- Vector Encapsulated Postscript (EPS) are welcome, although Postscript (PS) may also be sent. These files can be used directly to give high-quality results, provided the following rules are adhered to:
  - use standard fonts (Times, Helvetica, Courier, Symbol) and include them with the option saved “with fonts included” in the EPS file,
  - EPS should not include a TIFF preview and should be in ASCII (not binary) format,
  - the line strength should be greater than 0.3 pt (or higher if the figure needs scaling),
  - bitmap format such as PDF, TIFF, BMP, PNG and JPG are acceptable but they need to be transformed into EPS format in the production procedure.

For this reason black and white graphics files should have a resolution of at least 600 dpi and greyscale graphics files of at least 300 dpi.

For extended instructions on how to prepare graphics please contact the Editorial and Production Office.

Sending your files
You can choose to send your material via the Editorial Office website: https://articlestatus.edpsciences.org/ls/epj/e/ using the “Resubmit” menu. Or via e-mail at epje@edpsciences.org using a single compressed file containing an archive of your text and figures. Text and figures should be archived in a single file using public domain software (e.g., WinZip, PKZIP, etc.). Make sure that your mailing software does automatically encode attached files (or use uudecode to do it manually). Good reception of the files will be acknowledged with the official acceptance letter sent by the Editorial Office.

The proof correction stage
Once proofs are ready, an e-mail will inform the authors on how to download them by visiting the CIOP inquiry facility (http://ciop.sif.it/). Should they meet with difficulties following this procedure, we will immediately send the proofs by e-mail (attached .pdf), fax or regular mail, as per authors’ request.

Authors are called to carefully check the proofs by following the guidelines for corrections they receive with the e-mail. They should keep in mind that the aim of proofreading is to correct errors that may have occurred during the production. Therefore they should particularly check completeness of text, equation breaks, figures, tables and references.

- Only essential corrections are accepted. Any substantial modification of the text or mathematical formulas altering the content of the accepted version of the paper might re-open the revision process.

- The author has the final responsibility for the corrections.

- Corrections should be returned within 48 hours and can be sent back either as a detailed list by e-mail (quoting the amendments location with page, columns and line number) or by fax. Please do not alter the PDF proof file, add annotations or send back an amended manuscript file.

- As soon as the proofs are returned, the paper will be corrected and posted for the on-line publication. Note that once the paper is published on-line, further changes and amendments cannot be accepted unless by submission of an Erratum.

Offprints
Authors will receive the PDF file (with cover) of their article for free as soon as it is posted for the on-line publication. Paper reprints can be supplied on request by filling in the order form sent out with the proofs.

Copyright transfer
The Editorial Office will give to the corresponding author, when sending the acceptance letter, the address to download a Copyright Transfer Statement. The signed Copyright Transfer Statement should be sent back to the Production Office (epje.bologna@sif.it) before publication. The Copyright Transfer Statement is also available at www.epj.org and it is sent as a separate file together with the proofs e-mail message.

Open access publishing
EPJ supports and encourages the publication of open access articles: for more information see this link.

Policy on publishing integrity
EPJ is committed to safeguarding good scientific practice in publishing at all levels. Strong measures will be taken in all cases of misconduct. For more information see this link.
